

Temporary Housing

Sarandis Kalogeropoulos

Director Sales YOUNiQ, Precise Biometrics

Temporary Buildings - Project

Algeco, a modular building company, was responsible for establishing temporary housing for the industrial workers during a set-up of a new Battery Plant production. Precise was requested to deliver the following solutions:

- **Digital Key distribution** for 1000 rooms without any keys/cards/tags.
- Integration with **Wireless Smart Locks** to open the right door for the right person.
- Integration with **Room Booking system**.

The Value of this offering was to:

- Reduce amount of manpower to handle key distribution of incoming guests.
- Reduce the queuing to check-in to the room. They had a turnover of approximately 1000 persons bi-monthly.

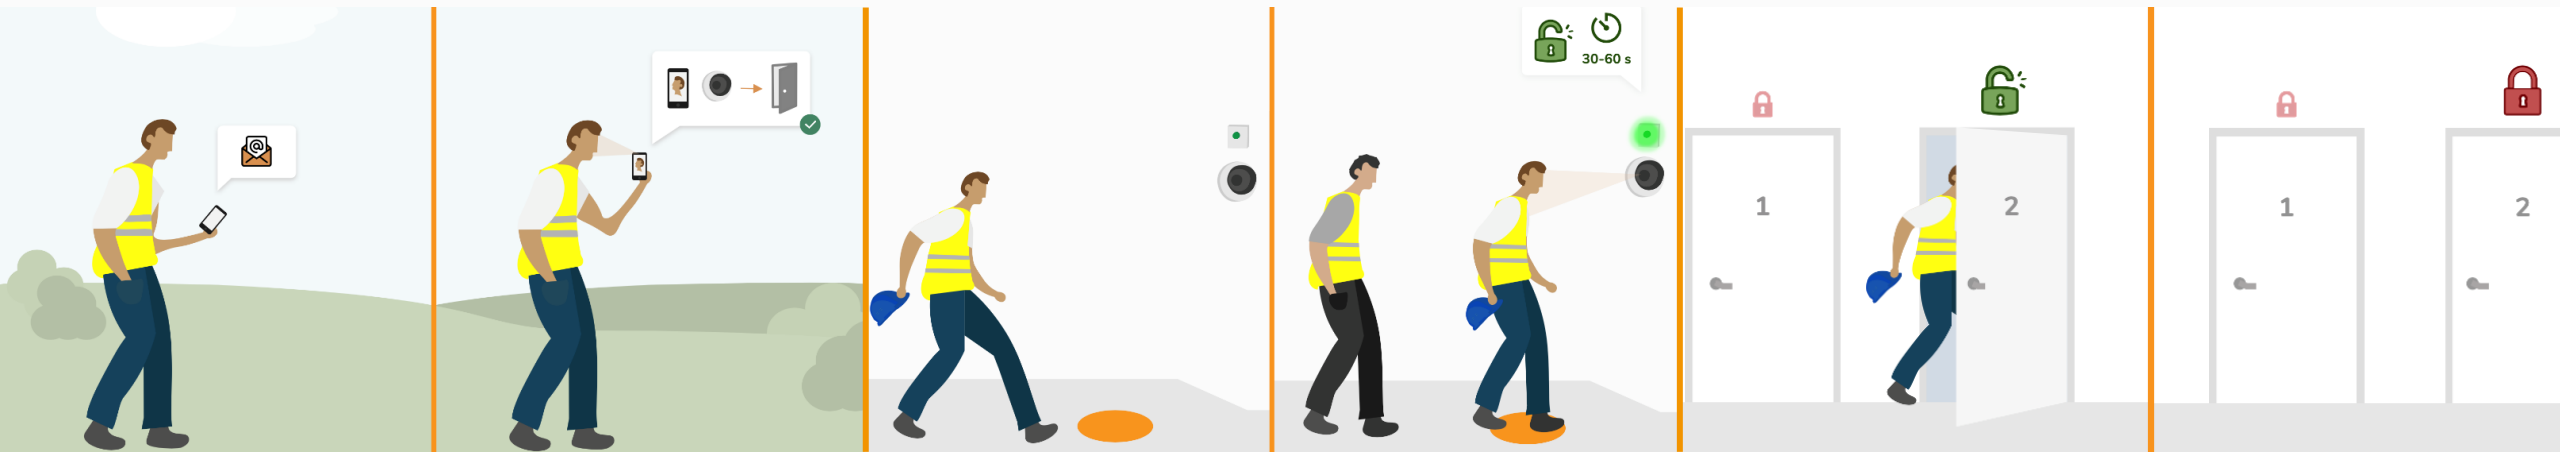

Traditional access at Modular Buildings

- 24/7 Reception
- Identification and Check-in
- Administration
- Lost key Handling
- Distribution of keys
- Temporary usage
